

MHS Clinical Portal Quick Reference Tips and Tricks:

“Hide” your recently discharged patients.

This should “stick” (remain static) from one session to the next.

The screenshot shows the 'Patient List' section of the MHS Clinical Portal. A dropdown menu is open under the 'Location' column, showing various hospital locations. The first option, 'NE Methodist No Disch', is highlighted. Three callout boxes provide instructions: 'In the Patient List area, select a "Profile."' points to the 'No Profile Selected' dropdown; 'First option shows recently discharged patients.' points to the 'NE Methodist No Disch' option; and '"No Disch" filters out discharged patients.' points to the 'No Disch' part of the selected option. The patient list table below shows columns for Name, Location, and Test Results. A 'NEWBORN C-SECTION DELIVERY' entry is visible at the bottom of the list.

Physicians practicing at Metropolitan Hospital would select the “Metro ” options (instead of NE Methodist options in the example below
