## MHS Clinical Portal Quick Reference Tips and Tricks: Patient Lists

**Ouick Select** 

This will address some screen real estate issues scrolling vertically and horizontally to review reports.

Once you minimize the patient list, you can use these steps to "Quick Select" the next patient.

| Patient List N                          | io Profile Selected •                   | Al v 🔲                          | Current Patient Name   |
|---|---|---------------------------------|--|
| Add Remove                              | Send Get Print -                        | Refresh Select Patient -        |  |
