

Explore 8 [IE8] Compatibility Settings to allow PACS Functionality

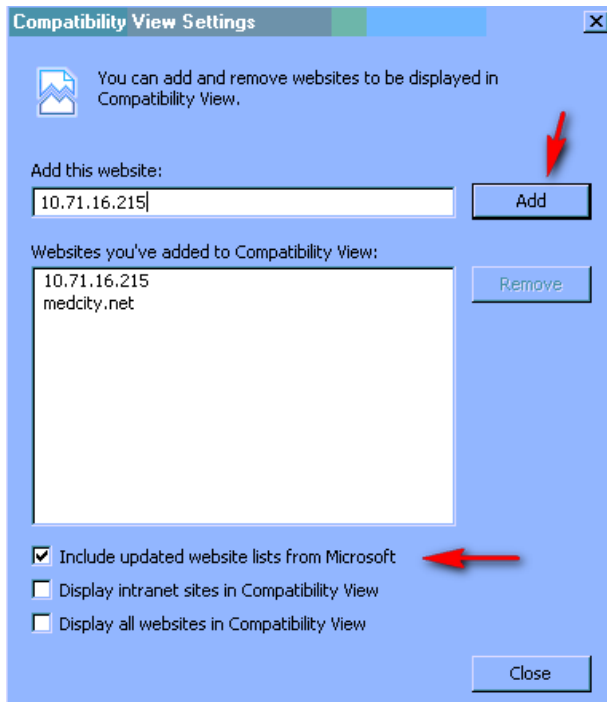

Below are simple steps on how to configure Internet Explorer 8 [IE8] to allow PACS to function. PACS is not yet certified for Internet Explorer 8, so Internet Explorer 8 must be set to show PACS in Internet Explorer 7 compatibility view.

Open an Internet Explorer browser window, click on **Tools**, then Click on **Compatibility View Settings**.

Add websites **10.71.16.215** and **medcity.net**.

Microsoft also provides a list of known internet websites that require compatibility view, which you may opt to include by checking the first box at the bottom of window (selected by default).

Close the Compatibility View Settings window and proceed to access PACS as normal. If you encounter issues, please call the PACS Help Desk at 210-575-0660.
